

Q1 How many employees are there and how many have left the company?

```
5
6
7 • select count(empid) as total_employees ,sum(case when Termd = 1 then 1 else 0
8     end) as Employees_left from cleaned_hrdata_set ;
9
```

<

Result Grid |  Filter Rows: | Export:  | Wrap Cell Content: 

	total_employees	Employees_left
▶	311	104

out of 311 total employees, 104 have left the company. This shows a noticeable level of attrition, indicating potential issues with employee retention that need further investigation.

Q2 Which department has the highest numbers of employees who have left the company?

4	•	SELECT
5		Department,
6	○	SUM(CASE
7		WHEN termd = 1 THEN 1
8		ELSE 0
9		END) AS no_of_Left_employees
10		FROM
11		cleaned_hrdata_set
12		GROUP BY Department
13		ORDER BY no_of_Left_employees DESC;

<		
Result Grid		
Filter Rows:		
	Department	no_of_Left_employees
▶	Production	83
	IT/IS	10
	Sales	5
	Software Engineering	4
	Admin Offices	2
	Executive Office	0

Production and IT/IS departments have a significantly higher number of employees leaving compared to others. This suggest that maybe facing issues like workload ,management , or job satisfaction.

Q3> Is salary influencing employee attrition?.

```
2
3 • select Termd,round(avg(salary),0) from cleaned_hrdata_set
4 group by termd;
```

<		
Result Grid		
Filter Rows:		
Export:  Wrap Cell Content: 		
	Termd	round(avg(salary),0)
▶	0	70694
	1	65690

Employees who left the company tend to have lower average salaries compared to those who stayed. This shows that salary could be a key factor influencing employees attrition.

Q4> Does employee performance affect attrition?

```
2 • select PerfScoreID ,count(*) as total_employees, sum(case when termd=1 then 1 else 0 end)as employees_left ,
3 round(sum(case when termd=1 then 1 else 0 end)*100.0/count(*),2) as attrition_rate
4 from cleaned_hrdata_set
5 group by PerfScoreID
6 order by PerfScoreID asc;
7
```

PerfScoreID	total_employees	employees_left	attrition_rate
1	13	4	30.77
2	18	10	55.56
3	243	82	33.74
4	37	8	21.62

Mid -performing employees show the highest attrition rate compared to other groups. This shows that these employees may feel undervalued or lack of growth opportunities.

Q5 > What is the Average tenure of employees before leaving the company?

```
2 • select Round(avg(datediff(DateofTermination_new,Date_of_hire_new))/365,2) as avg_teuere_year from cleaned_hrdata_set
3 where termd = 1;
```

avg_teuere_year
3.46

Average tenure of employees who left the company is almost 3.5 years .This indicates that

employees tend to leave after spending few years in organization.

Q6> which gender has a higher attrition rate in the company?

```
2 • select sex, count(*) as Total_employees, sum(case when termd = 1 then 1 else 0 end) as employees_left from cleaned_hrdata_set
3 group by sex;
```

sex	Total_employees	employees_left
F	176	60
M	135	44

Females has highest attrition rate.

Q7> What are the most common reasons for employee attrition?

```
2 • select TermReason, count(*) as total_employees_left from cleaned_hrdata_set
3 where termd = 1
4 group by Termreason
5 order by total_employees_left desc;
6 ;
```

TermReason	total_employees_left
Another Position	20
Unhappy	14
More Money	11
Career Change	9
Hours	8
Attendance	7
Relocation Out Of Area	5
Return To School	5

The most common reason for employee attrition is employees moving to another position, followed by dissatisfaction and higher salary expectation. This shows that better career opportunities and compensation are key factors influencing employees to leave the company.

>>Final Conclusion<<

From the analysis, it is clear that employee attrition is affected by multiple factors. A good number of employees have left the company, which shows there may be some retention issues. It was also observed that employees with lower salaries and mid-level performance are leaving more compared to others.

Another important finding is that many employees tend to leave after spending a few years in the company. This could mean that there might be limited growth opportunities or dissatisfaction over

time. Also, some departments and groups show higher attrition, which may need more attention.

Overall, the company can focus on improving salary, providing better growth opportunities, and increasing employee engagement to reduce attrition.
